-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-11 in the reply filed on 9/28/06 is acknowledged.

Claims 12-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 1 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Specifically, the claim is directed to a method but does not include any steps.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1756

Claim 1 is directed to a method, but does not include any steps. Specifically, it does not set form any steps defining how the claimed process creates the raised SMD pad, therefore the scope of the protection sought is unclear.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by US 2002/0173075 to Tie et al. (Tie). Tie discloses a method of providing a substrate with raised terminal portions comprising the steps of providing a non-conductive base; forming a patterned layer of conductors; forming a patterned layer of solder mask, which surrounds and defines terminal locations of the patterned layers of conductors; and disposing conductive deposits on the exposed portions of the layer of conductors, where the deposit extends beyond the surface of the solder mask. See paragraphs [0039], [0042], [0045], [0050], [0051], [0056] and [0064]-[0067]; and Figures 3, 6A-D and 9.

Art Unit: 1756

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by US 6,762,503 to Lee (Lee). Lee discloses a method of fabricating a solder ball pad comprising the steps of providing a sheet of insulative material; forming a metal layer defining a terminal pad on a surface of the sheet; forming a solder mask over the sheet having an aperture therein exposing a portion of the terminal pad; forming at least one electrolessly plated copper layer onto an exposed portion of the terminal pad, wherein the copper layer extends over a sidewall of the aperture and onto a portion of the solder mask adjacent to the aperture; and forming an electroplated metal layer over the electrolessly plated metal layer. See column 6, lines 53 to column 7, line 15; column 15, lines 37-55; and Figures 3A-B.

Allowable Subject Matter

6. Claims 2-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. McPherson whose telephone number is (571) 272-1386. The examiner can normally be reached on Monday through Friday, 8:00 AM to 4:30 PM.
